PROFESSIONAL SUMMARY

Android Developer skilled in Kotlin, Java, and Firebase with experience in REST API integration, Google Cloud services, and building responsive, production-ready mobile applications.

SKILLS

- **Java, Kotlin, Android Studio**
- **Android SDK, Retrofit, Room Database**
- **Git, GitHub, Agile/Scrum, REST APIs, Google Maps, Google Calendar API.**
- **Firebase , Google Cloud**
- **Data Structures & Algorithms , Debugging, Unit Testing, Responsive UI**

EDUCATION

- Computer Science | SNJB K.B.J. College of Engineering
2024 - 2028(Expected) **CGPA : 9.33**

INTERNSHIP

- **Eduskills cohort 14 | Google for developers** (Oct–Dec 2025, Remote)
Developed 5+ Android apps including News, Music, Fuel Estimator, Dice Roller, and Lemonade. Implemented Firebase authentication and real-time database integration, and optimized performance to reduce load times by 30%.

PROJECTS

- **Study App** – Built a secure notes app using Kotlin with Firebase Auth & Firestore, enabling encrypted storage for 100+ users and real-time sync for seamless, secure access.
- **Human Emotions App – Kotlin, ML (Hugging Face)** – Developed an Android application using Kotlin and Hugging Face ML models to detect emotional states from voice and text inputs with real-time sentiment analysis and clean architecture.

CERTIFICATES

- Eduskills Android Internship
- Google Playstore Listing
- Oracle Gen AI
